DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, drawn to hockey glove having low density and high density padding in each finger pad, classified in class 2, subclass 161.1
 - II. Claims 13-15, drawn to hockey glove having a rigid thumb plate and locking plate in the thumb pad, classified in class 2, subclass 161.1

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as providing impact protection for all fingers by using a composite layering of high and low density padding. Invention II has separate utility by providing protection to the wearer's thumb by preventing hyperextension of the wearer's thumb. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
